

Konnect NET

Make insurance requests hassle-free with SureMed

for Medtech, Indici and MyPractice

Make the switch to electronic today. Take advantage of our complimentary service seamlessly integrated with Medtech, MyPractice, and INDICI.

Facilitating swift, convenient, and secure delivery of medical information essential for the insurance process.

Streamlined

Provides a standard approach for dealing with insurance information.

Efficient

Better value for your time, with faster payment and easy reconciliation and less administration time frees-up practice staff.

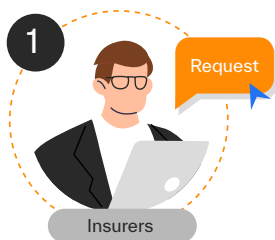

Secure

Your patient's information is encrypted and seen only by those authorised and required to view it.

How does it work?

Our service includes a fully electronic option that integrates with your Practice Management System (PMS).

Electronic information requests made by insurers are delivered directly to your PMS inbox.

When you open the form, SureMed pre-populates with information from your PMS.

You can review and amend content as required, maintaining complete control over patient information sent.

No printing, scanning or faxing required.

A PDF version of the completed report is saved within your PMS for auditing purposes

Paper requests are also supported where a practice is not set-up for electronic delivery or you prefer to continue working with paper.

SureMed takes responsibility for interaction with GPs for insurance requests, eliminating calls from insurers and pays you promptly.

We ensure that privacy protection of personal information meets industry and legal requirements.

Streamline your insurance medical requests using SureMed by Konnect NET, completing them in half the time compared to the manual process.

Don't wait, make the transition to electronic today!
