

Konnect NET

Effortlessly update us on
your pending SureMed
requests, online

We're always looking at ways to reduce your administration hassle. Our latest feature allows you to update us on your pending SureMed requests easily and securely in your web browser!

Free up your time

Reduce incoming calls and take away administration hassle.

Reduce your operational spend

No paper, fax, printing or scanning required, do it all online!

Protect patient information

Keep patient information safe in our secure portal, removing any potential breach of privacy.

How it works

1. You receive a weekly email with a unique link to our secure portal.
2. You click the link and put in your 4-digit access code (which will be set up for you).
3. You'll see a nice tidy grid of your pending requests in real-time, within your web browser.
4. Provide a quick status update using the drop-down button and add a comment if required, for that request.
5. Click update, repeat for each pending request and you're done for the week!

Getting started

- Call us on **0800 566 632**
- Simply provide us with an email address for your Practice to receive the weekly notification email. Ideally an email address shared by your team, in case you are absent.
- If you currently update us via our weekly fax or email responder, it's super easy to switch to the online version.
